February 25, 2020
Sustainability Committee
Minutes

Attendance: Dennis Ouellette, Becky Foley, Steve Konstantino, Valy Steverlynck, Will Pidden, Amanda Johnson, Maura Pillsbury, Sadie Southall
Absent: Bob Stevens, Charlotte Soule

Ryan Collins from Efficiency Maine will be doing a scoping audit using the data that Dennis provides to him on lighting (wattage, schedule, fixture count) and insulation.

It is important to reduce before we produce. We had discussion about having a paid audit by someone such as Mechanical Services, Apex, or Honeywell in all of the schools.

It is important to consider the carbon footprint and the financial impact when making decisions. What is the capacity to manage the system? What is the cost to maintain?

The second half of the meeting was discussion about the proposals from Revision Energy. All felt it is worth taking to the Board level for consideration. If the Board approves then we would need to have someone like John Eagan and the lawyers review the proposal.

The next step will be to get on a Board agenda to give them an update. The earliest this would be is March 11th.

Next Meeting: Tuesday, March 3, 2020 @ 7:00am

Agenda:
1. Committee feedback on Board presentation
