Introduction: Based on Kim Marshall Principal Evaluation Rubrics

1. These rubrics are organized around six domains covering all aspects of an administrator's job performance:
 - I. Diagnosis and Planning
 - II. Priority Management and Communication
 - III. Curriculum and Data
 - IV. Supervision, Evaluation, and Professional Development
 - V. Discipline and Parent Involvement
 - VI. Management and External Relations

The rubrics use a four-level rating scale with the following labels:

- 4 – Highly Effective
- 3 – Effective
- 2 – Improvement Necessary
- 1 – Does Not Meet Standards

2. The rubrics are designed to give principals and other school-based administrators an end-of-the-year assessment of where they stand in all performance areas – and detailed guidance for improvement. These rubrics are not checklists for school visits. To knowledgeably fill out the rubrics, a supervisor needs to have been in the school frequently throughout the year; it is irresponsible to fill out the rubrics based on one visit and without ongoing dialogue.

3. The *Effective* level describes solid, expected professional performance; any administrator should be pleased with scores at this level. The *Highly Effective* level is reserved for truly outstanding leadership as described by very demanding criteria; there will be relatively few scores at this level. *Improvement Necessary* indicates that performance has real deficiencies and must improve (although some novice administrators might start here). And performance at the *Does Not Meet Standards* level is clearly unacceptable and will lead to dismissal if it is not improved immediately.

4. To score, read across the four levels of performance for each criterion, find the level that best describes the principal's performance, and circle or highlight it. On each page, this will create a clear graphic display of overall performance, areas for commendation, and areas that need work. Write the overall score at the bottom of each page with brief comments, and then record all the scores and overall comments on the summary page.

5. Evaluation conferences are greatly enhanced if the supervisor and administrator fill out the rubrics in advance and then meet and compare one page at a time. Of course, the supervisor has the final say, but the discussion should aim for consensus based on actual evidence of the most accurate score for each criterion. Supervisors should go into evaluation process with some humility since they can't possibly know everything about an administrator's complex world. Similarly, administrators should be open to feedback from someone with an outside perspective – all revolving around whether the school is producing learning gains for all students. Note that student achievement is not explicitly included in these rubrics, but clearly it's directly linked to school leadership. How student results factor into evaluation is for each district or governing board to decide.

6. Some supervisors sugar-coat criticism and give inflated scores to keep the peace and avoid hurting feelings. This does not help an administrator improve. The kindest thing a supervisor can do for an underperforming administrator is give candid, evidence-based feedback and robust follow-up support. Honest scores for all the administrators in a district can be aggregated into a spreadsheet that can give an overview of leadership development needs.

Possible points of emphasis are action plans, professional development, work with teachers, students, parents or community members, use of data, surveys, data you are proud of, results of the action plan and why.

Peer Review

During the year, the principal accesses formative feedback through a self-selected peer review. Peer feedback is for professional growth purposes only and is not calculated into the summative effectiveness rating. A brief reflection will be included in each principal's e-portfolio.

Surveys

- The focus of the survey will be on meaningful goals that are individualized and targeted to a specific goal or target group.
- The evaluator and the principal will decide together what data to collect and from whom and in what manner.
- The evaluation of a principal is the responsibility of the superintendent and is part of a confidential personnel file. Board Policy: [GCOC](#)
