

STUDENT COMPUTER AND INTERNET USE AND INTERNET SAFETY

RSU5's computers, network, and Internet access are provided to support the educational mission of the schools and to enhance the curriculum and learning opportunities for students and school staff. This policy and the accompanying rules also apply to laptops and tablets issued directly to students, whether they are used at school or off school premises.

Compliance with RSU5's policies and rules concerning computer and Internet use is mandatory. Students who violate these policies and rules may have their computer privileges limited, suspended, or revoked. The building principal is authorized to determine, after considering the circumstances involved, whether and for how long a student's computer privileges will be altered. The building principal's decision shall be final.

Violations of this policy and RSU5's computer and Internet rules may also result in disciplinary action, referral to law enforcement, and/or legal action.

RSU5 computers remain under the control, custody, and supervision of the school unit at all times. The school unit monitors computer and Internet activity by students. Students have no expectation of privacy in their use of school computers, whether they are used on school property or elsewhere.

INTERNET SAFETY

RSU5 uses filtering technology designed to block materials that are obscene or harmful to minors, and child pornography. Although RSU5 takes precautions to supervise student use of the Internet, parents should be aware that RSU5 cannot reasonably prevent all instances of inappropriate computer and Internet use by students in violation of Board policies and rules, including access to objectionable materials and communication with persons outside of the school. The school unit is not responsible for the accuracy or quality of information that students obtain through the Internet.

In the interest of student Internet safety, RSU5 also educates students about online behavior, including interacting on social networking sites and chat rooms, the dangers of hacking, and issues surrounding "sexting" and cyberbullying awareness and response.

The Superintendent /designee shall be responsible for integrating Internet safety training and "digital citizenship" into the curriculum and for documenting Internet safety training.

The Superintendent shall be responsible for implementation of this policy and the accompanying "acceptable use" rules. The Superintendent/designee may implement additional administrative procedures or school rules consistent with Board policy to govern the day-to-day management and operations of the school unit's computer system.

Students and parents shall be informed of this policy and the accompanying rules through student handbooks, the school website, and/or other means selected by the Superintendent.
